

Construction Inclusion **COMMITTEE**

Merit Shop for Everyone

At ABC of Wisconsin, we believe that opportunities in our industry should be made available to all people. We believe in creating and championing conditions where individuals and organizations are limited only by their own potential and desire to succeed. This is the driving force behind the merit shop philosophy and ABC's Inclusion initiatives.

With the principles of free enterprise and open competition as the foundation, ABC of WI Construction Inclusion Committee's initiatives are focused on bettering the individual, the industry, and our members. We believe that it gives us the competitive advantage.

We are looking to grow our Construction Inclusion Committee, and we are looking for additional members to join us. Key objectives for the committee include:

- Helping members to recruit and retain traditionally underrepresented groups to the construction industry.
- Create real and meaningful relationships with community groups.
- Outreach and recruitment of new diverse members.
- Helping identify and resolve barriers in apprenticeship and other educational opportunities.
- Lead efforts to identify potential business opportunities and helping by providing diverse resources to members.

If interested in learning more information or joining the Construction Inclusion Committee:
